

## CERTIFICATE

---

Dear Customer,

You have contacted our company Gravotech Marking SAS, to know our situation with regard to the implementation of the Reach 1907/2006/EC Regulation.

As a major player in the design, manufacture and distribution of engraving materials, our actions in terms of regulatory monitoring have allowed us to identify this regulation since its first publication in December 2006.

We immediately created a database of chemical substances in our products. They are identifiable through the Safety Data Sheets obtained from suppliers of components and finished products.

On each evolution of the Candidate List published on the ECHA website, we check for the presence of listed substances in comparison with our database.

To date, we can confirm that:

- Our company and products have not been concerned by the pre-registration phase completed in June 2013.
- To our knowledge, our products do not contain any SVHC 181 (list in force at 15/01/2018 in a concentration above 0.1% weight for weight).
- Our product listed below are in compliance with the European Directive 2011/65/UE know as RoHS 2 (Restriction of use of Hazardous Substances) without restriction.

The range concerned is:

- LMM6000
- LMM6018
- LMM14

Certificate made in La Chapelle Saint Luc on 31/01/2018 for legal intents and purposes.
