LASER TABLE LS1000XP

Numerous innovative functions and features are combined into the LS1000XP, turning it into the ultimate engraving and cutting laser for intensive production.

HIGH PRODUCTIVITY LASER MACHINE

Our powerful and versatile CO2 laser engravers use a 10600 nm wavelength in the infrared range, which provides a precise and permanent marking on a wide range of materials such as natural materials (wood, leather, paper, fruits & vegetables), transparent material (glass, transparent plastics) and coated materials (painted surfaces, anodized aluminum).

MADE FOR CUTTING APPLICATIONS

Easily cut plastic, acrylic, wood, rubber, paper, and more to create quality signage and personalized items. The LS1000XP laser comes with cutting accessories such as a collection tray, a cutting table with removable slats and more. Powerful CO2 sources are available, up to 150W for heavy-duty jobs.

INCREASED USABILITY FOR REDUCED PRODUCTION TIMES

The front-loading and double pass-through of the LS1000XP machine offer total accessibility: front and sides doors on the chassis ease the loading of heavy or oversized items. Use the red pointer to position your engraving or cutting starting point, and reduce the risk of error.

KEY FEATURES

Large items engraving and cutting

Engrave and cut large items thanks to the LS1000XP vertical capacity of 300mm.

Cylindrical engraving is possible up to 200mm diameter with the rotary device.

Personalize large glass items such as bottles, vases and carafes, and create unique trophies and 3D awards.

Print & Cut option

Combine the Print & Cut option with the LS1000XP cutting capacity to create unique items.

Print on plastic, acrylic, wood, paper, and more with any printer, and laser-cut around the printing.

Create personalized signage, awards, on-demand displays, advertising stands, and so much more.

Wide laser lens range

Focusing optics are key to precisely set-up the laser engraving precision or cutting efficiency.

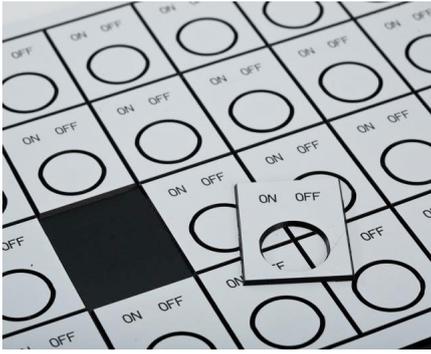

Choose the right lens for your engraving or cutting application among our extended range.

Open your business to new possibilities by selecting the perfect lens for any job!

SOFTWARE

Gravostyle™

Expert software made by engravers for engravers

Gravostyle™ is a professional engraving and cutting software that puts Gravotech engraving expertise in reach. Benefit from advanced possibilities and save time! Unique features available: Braille, Photostyle, Print & Cut, and more.

Due to our history of making engraving machines, we have a full understanding of the engraving process. Gravostyle™ is fully compatible with all of our technologies. The software/machine interaction streamlines and improves your day-to-day engravings with functions like Point & Shoot.

Lasertrace

Developed by Gravotech and enriched by numerous application experiences,

Lasertrace is a unique software specially designed to create marking files to be loaded in the laser system.

It includes a graphic composition to add text, logos and codes like Datamatrix in your marking templates.

You can describe your marking process according to specified rules: the actions (marking blocks) to be carried out, the sequence of execution and the possibility to implement a large choice of transitions (output activations, camera blocks, variables, etc).

SERVICE & SUPPORT

Training

Our training modules are designed to optimize your use of our solutions and are available for our full range of machines, software and accessories.

Technical support

We bring you local support in your language in more than 50 countries, where we have established presence directly and with our distribution partners.

Maintenance

Thanks to experience gathered with Gravograph and Technifor and our global presence in more than 50 countries with 150 Gravotech technicians and our distributor partners, we can offer you a wide range of services.

TECHNICAL DATA

LS1000XP

Laser source / technology	CO2
Available Power version	60W - 80W - 100W - 150W
Available lenses	2.0" - 3.0" - 4.0"
Dimensions (L x W x H)	1660 mm (65.354 in) x 1160 mm (45.669 in) x 800 mm (31.496 in)
Machine weight	220kg (485.017 lb)
Marking area max	1220 x 610 mm (48 x 24 in)
Max object height	300 mm (11.8 in)
Max. object weight	25 kg (55.116 lb)
Automatic Z axis	300 mm (11.811 in)
Noise level	≤ 66 dB
Speed	4000 mm/s (157.480 in/s)
Point & shoot	Yes
Operating temperature	10°C - 35°C (50°F - 95°F)
Connection to computer	USB
Laser safety classification	CDRH: Class 2
Beam diameter	0.1 mm (0,004 in) to 0.4mm (0,016 in)
Software	Gravostyle™
